Inside Supply Management® Weekly E-Newsletter

This weekly newsletter focuses on the latest news and trends impacting supply management professionals.

Weekly theme for feature content.

Week 1: The first week of the month focuses on one of the 16 competencies in the ISM® Supply Chain Capability Model, a set of excellence standards for supply management practitioners and executives.

Week 2: The second week focuses on the ISM® Report On Business® (ROB), one of the nation’s leading economic indicators. We’ll have information on the most recent releases of the Manufacturing (PMI®) and Non-Manufacturing (NMI®) indexes, as well as how procurement practitioners can use the ROB.

Week 3: The third week is metrics week. Since early 2017, The Monthly Metric has been a regular feature on Inside Supply Management®’s blog. In each edition, we identify a metric that practitioners are using and define it, and examine how it can help in their job.

Week 4: The fourth week provides practical advice — information that readers can take away and immediately use in their organizations.
